7.	Choice field 1	D	Chose your type	
8.	Choice field 2	C	Indicate your second choice	

Editor

Edit selected field:

Field name: Choice field 1

Field label: Chose your type

Field type: Database link choicelist

Standard list to use: Thesis list

Restrict to cohort: YES

Field description:

Default value:

Help text:

Label width: 150

Make common field between all instances

Clone field

Next, go to “Courses”, “List thesis subjects”

The screenshot shows the Consort TESTVERSION interface. At the top, there is a header with the Consort logo, a 'TESTVERSION' label, and a 'Cohorts:' section with links for [0], [2008], [2009], [2010], [2011], [2012], and [2013]. Below this, there is a 'HELP' link and an 'Add to favorites' button. A user login bar shows 'Karel Lemaitre - [Logout]' and a 'You are here:' breadcrumb trail: 'Courses | Add a new thesis subject'. A navigation bar at the bottom contains links for Home, Applications, Students, Scholars, Users, Management, Courses, Website, and Stu. The 'Courses' link is highlighted. A dropdown menu is open for 'Courses', showing options: List courses, Table with courses, Add a new course, List teachers, Find teachers, Add teacher, List thesis subjects (highlighted), Add a new thesis subject, PhD subjects - add new, PhD subjects - show list, and List summerschools. A red arrow points from the 'Courses' link in the navigation bar to the dropdown menu, and another red arrow points from the 'List thesis subjects' option in the dropdown menu to the main content area.

Home Applications Students Scholars Users Management Courses Website Stu

[Add new] -[Printable list]

Overview of thesis subjects for cohort 2009:

- List courses
- Table with courses
- Add a new course
- List teachers
- Find teachers
- Add teacher
- List thesis subjects
- Add a new thesis subject
- PhD subjects - add new
- PhD subjects - show list
- List summerschools

“Add a new” will give you the option of adding a thesis subject with their explanation. Every topic you enter, will be used in the choicefield we declared before. In this way, while making a form using this variable, the list you made will be presented to the student/applicant/user. (mind the correct cohorte... in this case 2009 is used)

And finally enter the data in the correct field. Save the thesis, add other theses and a list will be made. This list will be used for the choicefield we declared before.
